

SAMPLE COURSEWORK DOCUMENTATION

CLASS IX - DIGITAL TECHNOLOGY & INNOVATION

Design and Develop a Simple Informational Website

Topic: School's sports website/portal

Title Page

CLASS IX - DIGITAL TECHNOLOGY & INNOVATION

COURSEWORK

Design and Develop a Simple Informational Website

Website Topic: Bhutanese Culture and Tradition

Student Name: Tenzin Sherub Lhendup

Class & Section: IX I

Subject: Digital Technology & Innovation

Teacher: Tashi Yangzom

Date of Submission: ?

1. System Analysis

Website Name

Lungtenzampa Sports Website

Purpose

The purpose of my website is to provide simple information about sports events and forums (in the future)

Problem or Need

Our school doesn't have the facility to make a dedicated sports portal/website and students can't get information easily as the teacher may be busy and forget to send the news.

Intended Users

- Students
- Parents
- Teachers
- People who want to learn about our school's sporting events.

Information Provided

- Sports event
- Team Rosters (School)
- Match Routines (class)

2. Requirement Validation

I asked two potential users what they would like to see on my website.

User	Suggested Requirement
Parents	Not much but design
Home friends	Not much images

Final Requirements

1. Have the system working
2. Have navigation links between pages.
3. Include at least two relevant images.
4. Provide simple and accurate information.
5. Have a clear and attractive layout.
6. Include a footer.
7. Make users happy :)

3. Website Design

Before creating my website, I made a simple plan of the layout.

HEADER

Lungtenzampa School Website

HOME Match | Team Rosters | ABOUT | My journey
NAVIGATION

MAIN CONTENT

Sports Events

[IMAGE OF OUR
TEACHERS PLAYING
SPORTS (FB)]

Information about Events

Match and Team Rosters.

FOOTER

Pages Planned

Page 1: index.html

- Website title
- Welcome message
- Image
- Brief introduction
- Navigation links
- Design

Page 2: about.html

- Information about the purpose the Website
- Mission
- Goals of this website
- Images
- Link back to Home page
- Design

Page 3: Match(Class)

- Put images of match routines
- Give them news and updated(future)
- Put footer
- Link back to home page
- Design

Page 4: Team Rosters(School)

- Design a table and a status (Without css)
- Put names (Random) in the table
- Put footers
- Link back to home page.

Page 5: My journey

- Design
- Do Q and A
- Put footer
- Link back to home page

4. HTML Tags Planned

Website Part	HTML Tag	Purpose
Table	<table.	Adds table
Main title	<h1>	Displays the main heading
Subheading	<h2>	Displays section headings
Paragraph	<p>	Displays information
Image		Adds an image
Link	<a>	Links one page to another
Header	<header>	Contains the website title
Navigation	<nav>	Contains navigation links
Script	<script>	Acts like a function in Codemonkey and custom mechanics.
Footer	<footer>	Shows website information

5. Screenshots of Your Website

Screenshot 1: Home Page

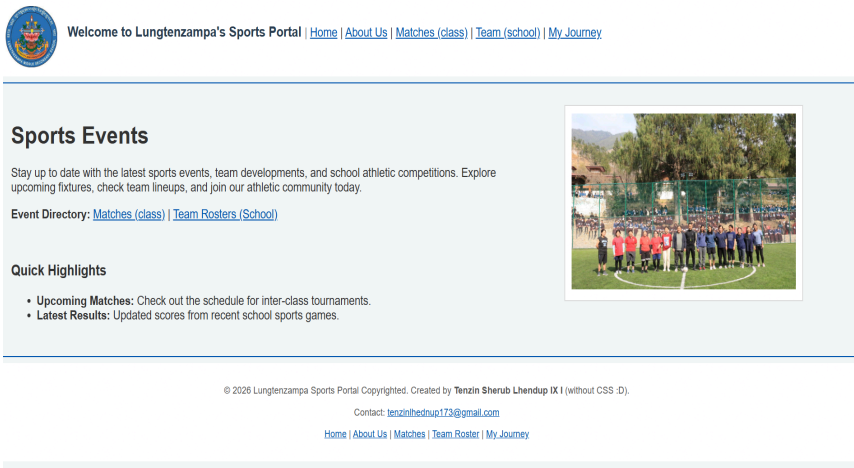

Figure 1 - Home page of my website.

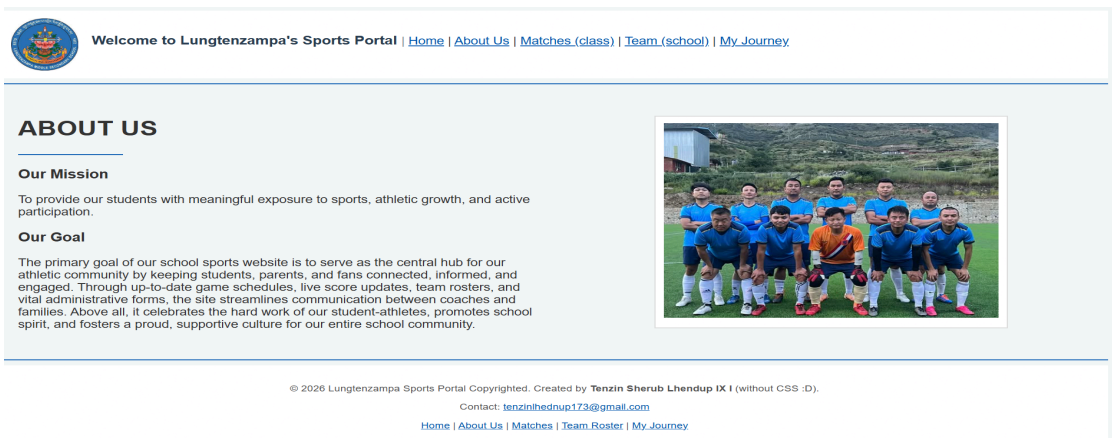

Figure 2 - School sports information page.

Screenshot 3: Navigation Link

Welcome to Lungtenzampa's Sports Portal | [Home](#) | [About Us](#) | [Matches \(class\)](#) | [Team \(school\)](#) | [My Journey](#)

Figure 3 - Navigation links connecting the web pages.

6. Testing Table

Test Item	Expected Result	Actual Result	Pass/Fail
Home page opens	index.html opens correctly	Opened correctly	Pass
About link works	Opens about.html	Opened correctly	Pass
Home link works	Returns to Home page	Opened correctly	Pass
Images appear	Images display correctly	Images displayed	Pass
Footer appears	Footer is shown at the bottom	Footer displayed	Pass
Website title appears	Correct title appears in browser tab	Title displayed	Pass
Design and music loop	To loop the music and design cleaner	Design displayed and music is playing on loop	Pass

7. Evaluation

My website successfully provides information about School's sports website/portals. The navigation links work correctly, and users can move between the Home page, the About page and other pages are working fine. The images and headings make the website easier to understand.

Most of the evaluation is in the my journey page

8. Improvements Made

Problem Found

Navigation link did not work

Image was too large

Text was difficult to read

System is too advance to our classmates and teachers

Layout looked too simple

Improvement Made

Corrected the file name in the <a> tag and naming.

Changed the image size using width and height function.

Increased the font size.

Used simple tags and function except script function which is used to music loop.

Added spacing and background colours using basic design with HTML.

Reflection

After testing and improving my website, I was able to create a simple informational website using HTML and without css. I learned how to plan a website, use HTML tags, link web pages, test my work, and make improvements to my design, functionality and architecture
